Created two .txt files – Document.txt and gitfile.txt

Created a .gitignore file
- ➔ `$ touch .gitignore`

Created a .log file
- ➔ `$ touch log.log`

Created a log folder in that folder created a .log file
- ➔ `$ touch mylogs.log`

Added files to the repository and ignored the **.log** files which are present in the local repo

- ➔ `$ git add .`

Checked Git Status

- ➔
```
$ git status
        On branch master
        Changes to be committed:
        (use "git restore --staged <file>..." to unstage)
                modified:   .gitignore
                modified:   commands.docx
                deleted:    sample.txt
```

Commiting the files using git commit command

- ➔
```
$ git commit -m"commit message"
[master df726e5] commit message
5 files changed, 3 insertions(+), 1 deletion(-)
```
